## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3 and 5-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Fuerst (6,775,930). Fuerst '930 discloses a midsole structure for an athletic shoe comprising: a midsole formed of soft elastic material (soft foam-like material 40); and a wavy plate assembly (30 & 50) disposed as said midsole; wherein said wavy plate assembly is composed of a wavy board (first member 30) disposed on the lower surface of said midsole and a sidewall member (first cushion member 50) that is provided discretely from said wavy board member and that includes a wavy bottom portion (see Figures 5-7 embodiments) overlapping said wavy board and an upraised portion extending upwardly from said wavy bottom portion to face a side surface of said midsole.

With respect to claim 3, note second midsole (outsole 16) which is disposed under said first midsole, and said wavy plate assembly is interposed between said first and second midsole.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

5. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Fuerst '930. With respect to claim 4, it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide a second wavy board interposed between the first and second midsole, since it has been held that mere duplication of the essential working parts of a device involves only routine skill in the art. *St. Regis Paper Co. V. Bemis Co.*, 193 USPQ 8.

***Allowable Subject Matter***

6. Claims 9-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

**Conclusion**

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shown are midsole analogous to applicant's instant invention.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jila M. Mohandesi whose telephone number is (571) 272-4558. The examiner can normally be reached on Monday-Friday 7:30-4:00 (EST).
